Skills

- Languages**
Java, Javascript,
Python, Dart, SQL
- Frameworks**
Spring Boot, Struts
2, Next.js, Django,
PyTorch, Flutter
- Enterprise**
IBM WebMethods,
IBM Business
Automation
Workflow (BAW)
- Databases**
MariaDB, MySQL,
PostgreSQL,
MongoDB, Firebase
- Tools**
Git, Tomcat, JBoss,
DBeaiver, IntelliJ
IDEA, Visual Studio
Code

Awards

1st Place – Ayotron Virtual Debit API Competition
January 01, 2023
Ayoconnect Indonesia
Co-developed a Flutter application with Django REST backend and external API integration.

Interests

- Low-Level Programming
- Artificial Intelligence
- Backend Development

Software Engineering graduate from Prasetya Mulya University with professional experience in enterprise application development, system integration, and business process automation. Experienced with Java, Spring Boot, Struts 2, IBM WebMethods, and IBM Business Automation Workflow (BAW). Skilled in backend development, API integration, enterprise middleware, and modern web technologies.

Education

- Universitas Prasetya Mulya** Bachelor in Software Engineering • 3.61/4.00
Software Engineering August 2021 - May 2025
 - Thesis: A Comparative Evaluation of Convolutional Neural Network Architectures for Offline Exam Cheating Detection
- Saint John's Catholic School BSD** High School Diploma in Natural Sciences
Natural Sciences July 2018 - June 2021

Experience

- PT Nusantara Duta Solusindo** BSD, Indonesia
Junior Java Developer August 2025 - Present
 - Developed and maintained enterprise banking and insurance applications using Java, Struts 2, Spring Framework, MariaDB, and Tomcat.
 - Supported implementation, testing, deployment, production support, SIT, and UAT activities for financial services applications.
 - Developed proof-of-concept solutions using IBM WebMethods and IBM Business Automation Workflow (BAW).
 - Conducted IBM WebMethods R&D, created technical documentation, and delivered internal training.
 - Contributed to enterprise integration and business process automation initiatives.
- Java Developer Intern** August 2024 - July 2025
 - Developed 10+ features across frontend, backend, and scheduler components for an enterprise banking application.
 - Contributed to framework modernization using Spring Boot, React.js, and Next.js.
 - Evaluated and developed a monolithic Spring Boot architecture with JSP and Thymeleaf.
 - Assisted with testing, documentation, and technology evaluations.
 - Collaborated with cross-functional teams to improve development standards and project delivery.

Experience

Universitas Prasetiya Mulya

BSD, Indonesia

Lab Assistant

August 2023 - July 2024

- Assisted laboratory sessions for Web Development, Mobile Application Development, and Introduction to Database Systems.
- Developed and delivered 4+ instructional materials weekly.
- Created 2+ weekly assignments and graded student submissions.

Volunteer

IN2FOOD Student Competition

January 2023 - August 2023

- Assisted logistics coordination and procurement.
- Helped schedule the competition timetable.

Programming 5.0

December 2022 - April 2023

- Created programming activity modules in English and Indonesian for 60+ participants.
- Mentored participants during hands-on programming sessions using Scratch.

Professional Training

IBM Business Automation Workflow (BAW) Training

Feb 2026 – Apr 2026

PT Nusantara Duta Solusindo

- API Integration
- Scheduling
- Process Development
- Custom View Development
